The best headphones for running

Today Calendar Display New Store Premium Settings

By Harvey Birdman i Comstock/Comstock/Getty Images Syncing your computer with your Android phone is a great way to get your music from your computer to your new smart phone. The syncing will also allow for the Android smart phone to be constantly updated with any new music every time you hook the Android smart phone to the computer. All you need is a USB cable, a few clicks of the mouse and how much time it takes for the music files to be transferred to your Android smart phone. There will be a power button on the front or side of the Android phone depending upon the model and carrier. The computer will have a power button on the front as well. Wait for both to go through their startup procedures before advancing to the next step. Plug a USB cable into the USB port on your computer. Then plug the other end of the USB cable into the Android smart phone. Some models of Android smart phones will have the USB port behind a rubber seal. If so, peel the seal back with your finger nail and slot the USB plug into the port underneath. Click "USB Storage Device" when you computer prompts you with a pop up menu. Even though you will be syncing the phone via Windows Media Player later, you must first authorize the phone to act like a storage device. The Android smart phone will then appear as a drive icon on your desktop. Double-click on your Windows Media Player icon in your Start menu. Click on the "Sync" tab on the top, this will display a list of phones currently attached to the computer. There should be none at this point. Click the white box and then select "Set Up Sync" in the drop-down menu. Type in the name of the Android smart phone (you named the phone when you first set it up). Click "Finish" and then wait for the Windows Media Player to inventory the music database on the phone. Synchronize the music between the computer and the Android smart phone. Do not disconnect the phone while it is transferring or it could corrupt the music file. If you do have to disconnect the phone, reconnect it and re-sync the Android smart phone as soon as possible to repair the damaged files. There will be no long term hardware damage. Android head logo (Image credit: Android Central) Android 10 has been out for more than a year now, and whether you're excited about its new permission settings for apps or the glorious dark mode, there are plenty of reasons to be eager for it to arrive on your phone. Android 11 has already been available for the Pixel lineup since day one. While we are seeing the likes of Samsung and OnePlus devices getting the latest updates, many handsets are still awaiting the update to Android 10. However, as with all Android updates, there's a difference between when Google launches the final build and when the new software actually arrives on your smartphone. We'll be taking a look at all of the major Android phone makers and breakdown when exactly you can expect an Android 10 update for your device. Let's dive a bit deeper and find out which of the best Android phones have been updated to Android 10. Google Pixel (Source: Hayato Huseman / Android Central (Image credit: Source: Hayato Huseman / Android Central)) Let's start with Google's own phones, the Pixel series. Android 10 has been guaranteed for every existing Pixel device, with the full list being as follows: Pixel 4a Pixel 4 / Pixel 4 XL Pixel 3a / Pixel 3a XL Pixel 3 / Pixel 3 XL Pixel 2 / Pixel 2 XL Pixel / Pixel XLs of September 3, 2019. Android 10 started rolling out for all of these handsets, making them the first batch of phones to be treated to 10's goodness. Samsung (Source: Nirave Gondhia / Android Central (Image credit: Source: Nirave Gondhia / Android Central)) Samsung is the big player in the Android world, as well as the biggest player in the entire smartphone world. The needle moves a fair bit when Samsung updates a phone. So far, Samsung has issued its Android 10 update to the following devices: Galaxy Note 20 / Note 20 Ultra Galaxy S20 FE Galaxy S20, S20+, and S20 Ultra Samsung Galaxy Z Fold / Z Fold 2 Galaxy Z Flip / Z Flip 5G Galaxy S10, S10+, S10e, and S10 Lite Galaxy S9 and S9+ Galaxy Note 10, Note 10+, and Note 10 Lite Galaxy Note 9 Galaxy M11 Galaxy M51 Galaxy A71 Galaxy A71 5G Galaxy A70/A70s Galaxy A51 Galaxy A50 Galaxy A42 5G Galaxy A31 Galaxy A30s Galaxy A21 / A21S Galaxy A20/A20s Galaxy A11 Galaxy A10L (Source: Alex Dobie / Android Central (Image credit: Source: Alex Dobie / Android Central)) In recent years, LG has become notorious for slow, inconsistent Android updates. It pains us to say that, but that's the fact. As of right now, LG has updated the following phones to Android 10: LG Wing LG Velvet LG G8LG G8XLG G7 / G7 One LG G7 ThinQ+ LG V60LG V50LG V40LG Q60LG Stylo 5LG K30LG K50LG K50sLG K61LG Q60Huawei (Source: Alex Dobie / Android Central (Image credit: Source: Alex Dobie / Android Central)) Huawei is one of the world's largest smartphone companies, with its devices ranging from high-end flagships to low-cost budget options. Almost all of the company's current handsets have already been updated to Android 10, including: Huawei P40 series Huawei P30 series Huawei P20 series Huawei Mate 40 Series Huawei Mate 30E Pro 5G Huawei Mate 20 series Huawei Mate 10 series Huawei Mate X / Mate Xs Huawei Y7a Honor 30 / 30 Pro Honor 20 / 20 Pro / 20 Pro Lite Honor 30S Honor 30i Honor 20S Honor View 20 Honor 10X Lite Honor 10 Honor View 10 Honor 9A Honor 9X / 9X Pro Honor 8X Motorola (Source: Joe Maring / Android Central (Image credit: Source: Joe Maring / Android Central)) Motorola used to be on top of its game when it came to Android updates, but in recent years, the company has gotten slower and more inconsistent with how it handles new software. As of right now, these are all of the Motorola phones that have successfully gotten their Android 10 update: Motorola Edge / Edge+ Moto G 5G Moto G9 Power Moto G8 Plus Moto G8 Play Moto G7 Play Moto G7 Power Moto G7 Plus Moto G Fast Moto Z4 Motorola One / One 5G Motorola One Action Motorola One Fusion+ Motorola One Macro Motorola One Power Motorola One Vision Motorola One Zoom Motorola RAZR / RAZR 5G Moto E (2020) Moto E7 Plus Moto G9 Plus Moto G9 Play Motorola One 5G Ace Moto G Stylus (2021) Moto G Play (2021) Moto G Power (2021) Moto G Play (2021) There are a few other phones that we expect to get Android 10 at some point, with those being: Nokia (Source: Joe Maring / Android Central (Image credit: Source: Joe Maring / Android Central)) When it comes to Android updates, one company that stands out among the rest is Nokia. Led by HMD Global, this current iteration of the Nokia brand has become synonymous with phones that have clean software and get timely, consistent updates. Nokia's been hard at work updating a bunch of its phones to Android 10, with all of the following now running the software: Nokia 8 V 5G UW Nokia 9 PureView Nokia 8.3 5G Nokia 8.1 Nokia 8 Sirocco Nokia 7.2 Nokia 7.1 Nokia 7 Plus Nokia 6.2 Nokia 6.1 Plus Nokia 6.1 Nokia 5.3 Nokia 5.1 Plus Nokia 4.2 Nokia 3.4 Nokia 3.2 Nokia 3.1 Plus Nokia 3.1 Nokia 3V Nokia 2.4 Nokia 2.3 Nokia 2.2 Nokia 1 Plus Nokia 1 Nokia 5.1 Nokia 3.1 Nokia 2.1 One Plus (Source: Apoorva Bhardwaj / Android Central (Image credit: Source: Apoorva Bhardwaj / Android Central)) One Plus touts fast updates and a fast track to the latest version of Android as a feature of its phones. The company has repeatedly proven that platform updates can be done quickly and fairly bug-free, and that hasn't changed with Android 10. Here are the phones for which Android 10 is now available: One Plus Nord N10 5G One Plus Nord N100 One Plus Nord One Plus 8 / 8 Pro One Plus 7T / 7T Pro One Plus 7 One Plus 7 Pro One Plus 7 Pro 5G One Plus 6T One Plus 6 One Plus 5 / 5T Despite being launched with Android Nougat back in 2017, the One Plus 5 and 5T were updated to Android 10 on May 27th, 2020. Odds & Ends (Source: Apoorva Bhardwaj / Android Central (Image credit: Source: Apoorva Bhardwaj / Android Central)) Here are the phones that don't quite belong in our categories above but still deserve a shout-out for rocking Android 10: ASUS ZenFone 7 / 7 Pro ASUS ZenFone 6 ASUS ROG Phone 2 / ROG Phone 3 ASUS ZenFone Max Pro (M1) ASUS ZenFone Max M2 Essential Phone Microsoft Surface Duo HTC Desire 21 Pro 5G Sony Xperia 1 Sony Xperia 5 / Xperia 5 II Sony Xperia 10/10 Plus Sony Xperia 10 II Sony Xperia XZ3 Sony Xperia XZ2 Sony Xperia XZ2 Compact Sony Xperia XZ2 Premium TCL 20 5G TCL 10 5G UW TCL 10L TCL 10 Plus Xiaomi Mi A2 Xiaomi Redmi Note 8 Xiaomi Redmi 7 Xiaomi Mi 10 Xiaomi Redmi K20 / K20 Pro Poco F1 Poco M2 Pro Poco M3 Poco X2 Pro X3 ZTE Axon 10 Pro (Europe only) ZTE Axon 20 5G Nubia Red Magic 5S Android 10: Everything you need to know! Today's cell phones do more than just make calls. You can take snapshots and videos, maintain a contact list, keep appointments in a calendar, send and receive SMS messages, and even play music. However, simply having all these features is only part of the story. For example, you can't do much with photos and videos unless you download them to your computer. Sending them through your cell phone carrier is far more expensive than e-mailing them. It's also much easier to add and edit contact information from a computer keyboard than from the cell phone's tiny keypad. The solution? Synchronize your phone to your computer, and keep everything up to date [source: German]. Here's how to sync your phone to your computer: Shop around for a good cell phone sync program. There are many available in stores and online (some free), but make sure you get one that's compatible with -- and has the features that will work with -- your cell phone. Check the specifications carefully [source: German]. Install the syncing program. Connect your cell phone to your PC using the USB cable that came with your phone. Note that, depending on its version, the sync program may start automatically, when the cable's connected to the cell phone and the computer [source: Microsoft]. On Monday mobile phone users, including those with Apple's iPhone, got a new way to sync and access information from the cloud. On Monday mobile phone users, including those with Apple's iPhone, got a new way to sync and access information from the cloud. Called Google Sync, the new service lets you sync up both calendars and contacts from a specified Google account and will send changes over the air -- both ways. The service uses Microsoft Exchange's ActiveSync protocol to get the job done, and because of this can actively push changes as soon as they're made. Previously the only way to get this kind of near-instantaneous change was to sync up an existing Exchange account with Outlook using Google's other synchronization utility, Google Calendar Sync. However, that system did not sync contacts and required users to actively run a software client on a machine that had Outlook running. Setting up your phone to sync up with Google's servers does not require any special software, however it's worth noting that if you have an iPhone or Windows mobile handset the process will wipe out any existing contacts and calendars from your device. This data loss does not occur on Nokia, BlackBerry, Sony Ericsson, or Motorola devices. Also, users who haven't already begun using Google's contact manager are encouraged to do so, as after syncing it becomes the one place where all of your contacts are stored. Another small caveat is that the service only currently supports up to five user calendars. Users of Google Calendar who may be used to more than that number may have problems with this solution. One thing that's missing from the equation is Google's Gmail service, which does not offer a push service. Future versions of Google Sync may add that to the equation. Competitor Yahoo has offered a free (although sometimes flaky) push service for its web mail since the iPhone's introduction in early 2007. -- posted by Josh Lowensohn
